

ECKES GRANINI INTERNATIONAL OPTIMIZES ITS EMPLOYEES PRESENCE WITH KELIO SOFTWARE

Eckes Granini has supplied Granini beverages for more than 40 years. The company has recently introduced the Bodet Kelio solution into its production and distribution sites in France which have over 270 employees.

The Kelio solution was implemented in order to provide each employee with an up-to-date Time and Attendance System. This met the needs of the entire organisation including the employees, the administrative team, production and sales executives.

The Kelio solution installed at Eckes Granini operates on a SQL server database and interfaces directly with Sage Software payroll.

The intranet allows all employees to post holiday requests and check their holiday rights and records.

After training by Bodet consultants, the HR Department was given responsibility for system management and looked after staff schedules, absences and holiday requests, resource planning and employee shifts.

Anne Depardon, HR Assistant Manager, said, "the new system has been *operational since*

January 2010 and enables us to provide the employees with transparent information regarding their shifts, holiday requests, absence, etc.

The system has been very well received by the entire team, employees like the transparency and enjoy real time data as well as a platform to effectively plan from."

ABOUT BODET SOFTWARE

BODET Software is a major European supplier of Time systems for the industry. Its Kelio systems provide every employee with transparent and complete information about their time records through the Company Intranet. The experience of Time Management in several European markets gives BODET Software an edge on forward looking solutions for employees' management
