

HOBIE CAT EUROPE CHOOSES BODET SOFTWARE TIME AND ATTENDANCE SYSTEM

HOBIE-CAT Europe is the European manufacturer of the world famous Sport catamarans based in the south of France.

HOBIE CAT Europe produces its polyester beach catamarans in 4 manufacturing units and had been using BODET Time and Attendance systems since 1989.

To meet current European legislation and to provide employee planning systems the HR department decided to implement the Kelio Time and Attendance system from BODET. The implementation had three objectives:

- manage the employee presence according to the 35 hour working time laws
- reduce the administrative work load of the HR Department
- enable the evolution toward activity management and employee planning

The Kelio System was the best solution to enable Hobie-Cat to transfer employee data

directly from the workshop to the HR Department.

The decision by Hobie-Cat to implement Kelio solution was decided on the following criteria:

- good response to the users' requirements
- direct interaction with the system's manufacturer
- potential evolution toward production time management

The installation of the system through the different business units was quick and has proved to be a great success as Mr Robert, HR and Financial Director recalls: "*the use of Kelio Software by two team managers and one administration employee has been a huge success. A significant amount of time is saved, we also benefit from improved reliability and better utilisation of staff resources.*"

ABOUT BODET SOFTWARE

BODET Software is a major European supplier of Time systems for the industry. Its Kelio systems provide every employee with transparent and complete information about their time records through the Company Intranet. The experience of Time Management in several European markets gives BODET Software an edge on forward looking solutions for employees' management
